Application for Ultralytics Intern

Dear Ultralytics Team,

I am writing to express my keen interest as an Intern at Ultralytics. Possessing a strong foundation in machine learning, software development, and an internal motivation to make technology accessible, I feel that there is strong synergy between my passion and the mission of Ultralytics to democratize AI.

As an Information Technology student at Academic City University (GPA: 3.95), I've built hands-on experience in developing real-world applications—from a transportation system that optimizes routes for over 500 users to a Java-based mobile money simulator that mimics 15+ real-world financial operations. My technical stack includes

Ultralytics' commitment to making AI universally accessible deeply resonates with my personal values. Through my non-profit initiative ElevatEd, I've hosted tech literacy workshops in Ghanaian high schools, directly impacting 300+ students who previously had little to no exposure to AI or software development.

I am eager for the opportunity to work with your development team, creating impact in impactful projects, and professional growth under industry leaders. Thank you for considering my application—I look forward to elaborating further on how I can contribute to your ongoing innovations.

Yours Sincerely,

Kwesi Koranteng
